

# Bowling for Math Facts

## Materials Needed:

- Plastic bowling pins
- Plastic bowling ball
- Marker

## Directions:

- Write numbers on the pins that you want your child to work with.
- Make sure to have a couple of the pins have the “operation” that you are working on with your child (+, -, x).
- Have your child roll the ball and then make a fact with the pins that they knock down.
- Have your child say and answer the problem out loud.
- As an extra step, you could have your child write down the math fact with their answer. Keeping a record of what they of the facts that they are practicing.
